

Product List by Quadrant

One way teachers can identify their current levels of rigor and relevance as well as think of ways to raise those levels is to reflect on the verbs used in test questions and the products that comprise student work. Following is a list of products linked to each quadrant. These products are not always perfect indicators of the level of rigor and relevance, but they often can be used to identify the level.

Product List by Rigor/Relevance Quadrant

Notes:

- Products listed in each quadrant are the typical products that students will use to demonstrate learning in each quadrant. Also consider the context and work in which students are engaged when determining the level of rigor and relevance.
- Some products can be used in multiple quadrants.
- Products are listed where they are used most frequently.

C	
abstract	exhibit
annotation	inventory
blog	investigation
chart	journal
classification	outline
debate	plan
essay	report
evaluation	

D	
adaptation	model
blueprint	new game
book	newspaper
